

PhenObs Seminar Series

First Thursday every month 15.00-16.30
(UTC+1)

Each seminar includes 1-2 short presentations (15 min presentation and 15 min discussion) and 30 min to discuss additional topics.

If you are interested to join the meeting, please contact phenobs@uni-jena.de and we will provide you the link and password.

Date	Speaker:	Title:	Additional Discussion topics:
4.2.21	Richard Primack (Boston)	Expanding the PhenObs Network to include far more species.	Monitoring start 2021 Citizen Science in PhenObs
4.3.21	Maria Sporbert (Jena) & Desiree Jakubka (Jena) Till Deilmann (Jena)	Patterns in phenology and plant functional traits Patterns in phenology in herbaceous species from Botanical gardens and natural habitats	
15.4.21	Tomáš Herben (Prague) & Tomáš Koubek (Prague) Annalena Lenk (Jena)	Growth phenology of perennial herbs: patterns, tradeoffs, and links to flowering phenology Patterns in flowering and growth phenology in species from different habitats - a case study comparing plant populations from Jena and Prague Botanical Gardens	

Date	Speaker:	Title:	Additional Discussion topics:
6.5.21	Carolin Plos (Halle) Sabrina Träger (Halle)	"The effect of climate and land use on phenology and flower traits - first insights from a global change field experiment." "Exploring the ecology of <i>Primula veris</i> with the help of Citizen Scientists across Europe"	Magdalena Hauer (Vienna) – Short presentation of a school project monitoring herb. species in Vienna
10.6.21 (due to public holiday on the 3 rd of June)	Yongshuo H. Fu (Beijing) Renata Schnáblová (Prague)	The different temperature response between leaf-out and flowering among tree species. <i>Bud phenology and preformation</i>
