

Call for Early Career Researcher Working Groups and Modular Synthesis Projects (SynFlex)

- Pre-proposal deadline is **22 March 2022 (11:59 PM CET)**.
- Full proposal deadline is **22 June 2022 (11:59 PM CET)**.
- **Funding decisions will be made in September.**
- Start date of projects is January 2023 or later.
- Financing after September 2024 is subject to approval of iDiv funding beyond DFG funding.
- Place of work and/or in-person working group meetings is [iDiv in Leipzig](#).
- All topics and questions related to synthesising biodiversity research are welcome.
- **With this call, we want to specifically encourage applications from researchers and topics from regions that are often underrepresented in science (see list [here](#))**
- **The projects must have at least one PI from such an usually under-represented region and working groups must have at least one additional participant from such a region.**
- Each proposal needs at least one [iDiv member](#) (full & associated are eligible) as a participant or PI/Co-PI.
- Lab or field work is not funded. Any research data should exist and should be available.
- Please read very carefully the full programme description for all details and proposal templates on our [call website](#).

Early Career Researcher Working Groups: ECR

- Applications are open to early career researchers (ECR) = people who are PhD students or completed their PhD no more than 6 years in the past, counted with this call deadline (extensions possible).
- Groups should consist of small collaborative teams of eight ECR participants incl. two senior researchers who meet two - three times

Modular Synthesis Projects: SynFlex

- Applications for funds to be used flexibly for different approaches, potentially to be combined: e.g. mixture of working group meetings, short-term guests, scientific helpers (based in Leipzig) - be creative!

sDiv is the synthesis centre of iDiv, the **German Centre for Integrative Biodiversity Research (iDiv)** Halle – Jena – Leipzig, a research centre of the DFG. iDiv's main mission is to promote **theory-driven synthesis and data-driven theory** in biodiversity sciences and to provide the **scientific foundations for the sustainable management of biodiversity**. sDiv supports this mission by ensuring close collaboration between theoreticians, empiricists, and practitioners inside and outside of iDiv, by fostering the establishment and maintenance of networks within the scientific community across the world.
