

To support our research activities in the DFG funded project “Plant trait variation and evolution in the biodiversity-ecosystem functioning context” we are looking for a motivated

Student helper

Your tasks: helping with processing (weighing, milling) of plant samples from field and greenhouse experiments.

Time: The employment period is 3 months (December-January-February).

Workplace: iDiv, German Center for Integrative Biodiversity Research, Puschstraße 4, Leipzig.

The employment is contracted via UFZ, Helmholtz Centre for Environmental Research.
